The 28th Annual Western Canadian Crop Production Show will showcase leading-edge technology, services, and products in Prairieland Park’s world class trade and convention facilities, encompassing over 220,000 square feet of indoor space and expanded outdoor space. Previous years’ exhibitors realize the importance of this show, requesting additional space to launch new products and equipment. Industry groups appreciate the newly renovated state-of-the-art conference and meeting facilities. These factors combine to offer an event that is larger than ever before.

Produced by Saskatoon Prairieland Park, with the assistance of a volunteer committee the show continues to attract an audience from a wide geographic base. Our commitment to maintaining an event that is focused on crop production has proven successful - evident by our many long-time exhibitors and the continual attendance of qualified patrons.

The industry as a whole has embraced Saskatoon each January. The Western Canadian Crop Production Show, in conjunction with Crop Production Week’s in-depth information and industry meetings, has created a week of activity that attracts the true leaders in Canadian grain production.

On behalf of our entire staff, I hope you enjoy your visit to Prairieland Park, and that your experience at the Western Canadian Crop Production Show is both interesting and informative.

LORI CATES agriculture manager

“MacDon’s FlexDraper® is helping us recover at least $60,000 more in beans.”

GREG BIGHAM, Vergennes, IL – Owns a 45’ and two 40’ FD70 FlexDraper® Headers mounted on John Deere Combines
FROM The Premier of Saskatchewan

Brad Wall

On behalf of the Government of Saskatchewan, I am very pleased to welcome you to the 2011 Western Canadian Crop Production Show.

For 28 years, the Western Canadian Crop Production Show has been the destination for producers, from across Saskatchewan, Alberta and Manitoba, for gaining and exchanging information on innovative ideas for the production, processing and distribution of food crops. This first-class showcase presents a great opportunity for all stakeholders to meet and develop new networks for collaboration.

Continually expanding, this year’s show promises to be bigger and better than ever. The organizers are certainly commended for all their efforts in mounting this outstanding showcase of innovation and business excellence. And, the generous support of the sponsors is very much appreciated.

A strong and vibrant agricultural sector benefits all of us. I know that you will enjoy your time at the Show and I invite you to take part in the many Crop Production Week events held throughout Saskatoon.

Donald J. Atchison

It is my pleasure to extend a warm welcome on behalf of the citizens of Saskatoon to all those participating in the Western Canadian Crop Production Show.

This impressive showcase event provides valuable information on the technology, products, and services available to assist in a successful crop production business. I am sure that participants will benefit greatly from the innovative exhibitor information as well as theatre presentations.

Thank you to the organizers who have worked hard to coordinate the 2011 Production Show. This premier grain industry event is a valuable resource to assist crop producers in their planning and decision making for the upcoming season.

I invite visitors to find some time to enjoy our city and experience our world-class hospitality. Saskatoon is a great place – visit our wonderful attractions, restaurants, and shopping amenities to discover first-hand the qualities that make Saskatoon Shine.

Best wishes for a very successful and beneficial show.
Curtis Gulka

Welcome to the 2011 Western Canadian Crop Production Show!! Thank you for spending your important time with us, we're sure you'll find tremendous value again at this year's show. Each year we present the most advanced equipment, technology and suppliers to help you successfully manage your farm operation.

We are again pleased to offer several timely and interesting topics at the Bayer CropScience Information Theatre including discussion on micronutrients, herbicide resistant weeds and specific crop diseases that may be more evident due to the unusually wet conditions this year.

Building on last year’s success, the Combine Clinic is now running two days and is sure to sell out. This event was an overwhelming achievement last year, and will again provide producers with some terrific information about operating and adjusting their combines efficiently.

New for the show this year is more dedicated and specialized meeting and conference space. Watch for events hosted throughout the building, as companies offer on site training and seminars.

The Western Canadian Crop Production Show attracts large crowds each year, offering the agriculture industry tremendous opportunities to view the latest advancements in products, and technology, and farming methods. On behalf of the show committee, Prairieland Park, it's staff and all our volunteers, thank you again for attending the show.

CURTIS GULKA  Chairman – Crop Production Committee

Inside every MICHELIN® tire is a better way forward.

Nobody works in ideal conditions. That’s why every MICHELIN® Ag tire features MICHELIN R-1W Advanced Radial Technology™. You may not work in ideal conditions, but with technology like this inside your tire, you’ll feel like you do. A better way forward in every condition.

To find out more, go to www.michelinag.com.

Visit the MICHELIN booth #B46-B45-B19-B20 located in Hall B.
The President of Saskatoon Prairieland Park Corp.

Adele M. Buettner

On behalf of Prairieland Park’s Membership and Board of Directors, welcome to the ‘sold out’ 2011 Western Canadian Crop Production Show. In addition to an outstanding program of lectures, demonstrations and displays, we are also proud to welcome you to our newly renovated facility.

During the 28th annual show, exhibitors, farmers and patrons will enjoy a fresh layout, additional combine clinics, an increased number of international exhibits, and more new products than ever before.

Western Canadian Crop Production Show participants will also discover the latest in technology, services, products and information. Speakers in the Bayer CropScience Information Theatre will discuss herbicide resistance, ‘A to Z on Micronutrients in Western Canada,’ crop disease, and ‘Environmental Farm Plans.’ You may also wish to take part in Pulse Days or Canola Growers meetings as they are re-locating to our new breakout rooms.

This year’s Show occupies more than 220,000 square feet of indoor space, along with a record number of outdoor exhibits. Thank you for your continued support and ongoing interest in the Western Canadian Crop Production Show. We appreciate and welcome those of you who traveled from within Saskatchewan and recognize the added effort to the many who ventured from across Canada and the United States to participate in our annual event.

ADELE M. BUETTNER President Saskatoon Prairieland Park Corp.
COMBINE Performance Clinic: PICKING UP THE PROFIT

$50 pp*  LOCATION  Saskatoon Prairieland Park, Ag Centre
DATE  January 11 & January 13, 2011
TIME  8:00 am – noon

DON’T LEAVE YOUR HARD EARNED PROFIT ON THE GROUND.

Did you know that you can lose up to five bushels per acre if your combine isn’t adjusted properly? Join us for Picking up Profit: a combine performance clinic where you’ll hear expert advice from leading manufacturers as they walk you through the critical adjustments for your combine models. Learn what harvest loss really means in terms of performance, productivity and operating economics at this informative event.

GUEST SPEAKER
Les Hill, Manager, Business Development/Technical Services Prairie Agriculture Machinery Institute (PAMI) “Harvest Yield Loss”

HEAR EXPERT ADVICE

Understand which combine components control the basic functions of your combine and how their adjustment along with other factors will result in greater efficiency.
• Learn to judge how effectively your adjustments are working.
• Learn the valuable skill of collecting and accurately measuring loss.

AGENDA
8:00AM – 8:30AM  REGISTRATION
8:45AM – 10:00AM  LES HILL, PAMI – “HARVEST YIELD LOSS”
10:15 - NOON  CONCURRENT SESSIONS PRESENTED BY 5 MAJOR COMBINE MANUFACTURERS IN CANADA

Following the sessions, participants will have the opportunity to visit the Western Canadian Crop Production Show and have lunch (coupon valid at any concession)

WE’RE HERE. DROP BY!
The Crop Production Show is a welcome opportunity to talk to the people we serve.
The Saskatchewan Ministry of Agriculture is here to talk with you about what matters most to crop producers, and the programs and services we offer.
That invitation is ongoing, throughout the year, across Saskatchewan. Specialists in our 10 regional offices welcome your questions about crops, livestock, forage, and farm business management.
Our doors are always open to the people who grow Saskatchewan – so drop by our booth, contact your nearest regional office or visit us anytime at www.agriculture.gov.sk.ca.

Saskatchewan
Ministry of Agriculture
**NEW PRODUCT**

**MAGNETIC CAMERA PACKAGE**

- The simple solution to direct your grain auger or conveyor into the bin (now you can see exactly where the auger spout is, in relation to the bin opening)
- Specially designed with very powerful magnets (250 pound) to adhere to grain auger tubes, combine augers, conveyors, etc., etc.
- Can be easily removed for off season or other applications

**FULL-BIN SUPER SENSOR**

Never Climb A Bin Again

- Equip your auger to sense when the bin is full or when your air seeder is full. Powered by the auger battery. The sensor and light are encased in a durable, weather-proof sealed housing.

For more information, contact Brownlees Trucking Inc., Box 1172, Unity, Sask., S0K 4L0, phone 306-228-2971

Toll Free 1-877-228-5598  www.fullbinsupersensor.com

**FILL YOUR AIR SEEDER IN MINUTES**

- Less Downtime Means More Acres

- Reaches all air seeders • Load rail cars • Sizes from 490-1200 Bushels • Fill grain bags • Stainless steel options available • Wireless remote (Optional) • Unloads 2 tons per minute • Haul grain from the field

**Tired of Totes?**

Come see for yourself, at our booth in Hall A and change the way you handle glyphosate on your farm.

Have glyphosate delivered to your farm in bulk...just like your fuel!

Call us toll free at 1.866.721.1800

Online: www.therackonline.com
The incidence of herbicide-resistant weeds in Western Canada is continually increasing. The most prevalent cases of resistance include Group 1- or 2-resistant wild oats, Group 1-resistant green foxtail, and a number of Group 2-resistant broadleaf weeds, including kochia, wild mustard, cleavers, among others. Resistant populations of Group 1 wild oats in Manitoba, Group 2 spiny annual sowthistle in Alberta, and Group 2 kochia throughout the Prairies now outnumber susceptible populations. Reliance on these two herbicide groups in Western Canadian cropping systems has resulted in a high selection pressure for resistance in weed populations.

The introduction of new herbicides with new modes of action has slowed considerably over the past 25 years. Therefore, farmers should not expect another new herbicide to be just around the corner to solve their resistant weed problem. We all have to utilize the currently available tools as effectively as possible. The current status of glyphosate resistance in Canada and around the world will be discussed, and ways we can best preserve this important weed management tool. In addition, best management practices will be outlined to assist farmers to delay or manage herbicide-resistant weed populations.
From our treehouse to you

SaskPower Shand Greenhouse grows hundreds of thousands of seedlings each year to help protect our environment and offset the damaging effects of greenhouse gases. SaskPower is working with you to make our world a whole lot greener.

Visit us in Hall B – Booth B17 to find out how to apply for free seedlings.

saskpower.com/shandgreenhouse

SUCCESS
SOME FARMERS PLANT IT.

Question: Are the successful farmers the ones who use Certified seed or do the farmers who use Certified seed become successful? Either way you look at it, Certified seed opens the doors to new opportunities for success. Efficient use of inputs, quality assurance, new markets – it all starts with Certified seed. Why settle for less?

This message brought to you by Canada’s seed industry including growers, breeders, seed trade, and the Saskatchewan Seed Growers Association.
Application Equipment

It's all we do. We specialize in it. In fact, we offer the most complete line of application equipment in Western Canada.

Today, with an expanding stable of all-new models and features, we offer the most rugged, dependable and comprehensive line of application equipment with a reputation for quality and innovation.

Take one look at the Condor G-Series, available with Miller's exclusive Spray-Air™ air booms, and Condor SmartDrive™ front wheel assist, and Nitro 4000 Series sprayers, and you'll understand our commitment to your productivity.

Our product line, and our Western Canadian dealers' dedication to service, deliver on our promise of high productivity.

That's a promise we don't take lightly.

Miller Factory Representatives will be in attendance at the Western Canadian Crop Production Show, January 10-13

PLANT DISEASE
Forecast for 2011

FAYE DOKKEN-BOUCHARD

White Mold
The 2010 season was a challenge for growers in Saskatchewan, with various issues arising from the excess moisture. Observations by growers and agronomists as well as during basic disease surveys conducted by Saskatchewan Agriculture and collaborators, and submissions to the Crop Protection Laboratory in Regina, back up the view that wet seasons bring an increase of plant diseases. Reports of isolated cases and/or widespread incidence plant diseases in 2010 included the ascochyta complex on pea crops; ascochyta blight, anthracnose, sclerotinia stem rot (white mould), botrytis grey mould, and stemphylium blight on lentil crops; sclerotinia stem rot on canola crops; fusarium head blight and leaf spotting diseases on cereals.

In this presentation, we will discuss the resulting potential impact on pathogen levels and disease risk for next year and the ongoing importance of integrated pest management. Crop rotation, variety selection, seed quality, seedling health, crop scouting, and cultural and chemical control measures will be important in 2011 – as with any other year. As always the weather will be the primary determinant of the disease forecast for the coming season.

STEM ROT Blight on crops

Big equipment raises big concerns.
Know the exact location of every overhead power line on and around your farm. Lower all equipment before you move it. Plan your route to stay safe.
If you contact a power line, stay in your vehicle. Keep others away. Call 9-1-1. Your life could depend on it.
Stop by our live electrical display in Hall B to learn more about working safely near electricity.

THE WESTERN CANADIAN CROP PRODUCTION SHOW

Overview

The Western Canadian Crop Production Show has become Western Canada’s premier grain industry showcase by presenting information to producers on the latest technology, services and products including:

- Crop production practices and products
- Equipment manufacturers
- Crop inputs and application
- Commodity marketing
- Seed bed preparation
- Seed and soil information
- Straw & chaff management
- Grain handling, processing, storage & transportation
- Harvest technology

The business of grain production has changed significantly, and Western Canadian grain producers continue to prove they are the best in the world at what they do. The Crop Production show gives producers the opportunity to maintain a competitive edge by learning about new products and technology for this rapidly changing industry. The show has become the perfect opportunity to begin this process... in early January. Visitors can speak with seed distributors, crop protection and fertilizer representatives, and grain marketers to assist them in making their planting decisions as well as purchase the equipment technology required for the coming year.

FUTURE SHOW DATES

January 9 – 12 2012
January 8 – 11 2013
January 13 – 16 2014
January 12 – 15 2015
Community Service Radio!
Find out about the markets every day at the close.

The Western Producer Markets Moment service provides you with a daily e-mail of crop and livestock information, sent every afternoon after markets close.

It’s easy to read. It pulls information together into one simple report. It will keep you in touch with the market and help you price and sell. It only takes a moment. It’s free.

CROP PRODUCTION WEEK

2011 Edition of Crop Production Week

January 8 - 15 in SASKATOON

Crop Production Week 2011 begins January 8.

The 2011 edition of Crop Production Week will run from Saturday, January 8 to Saturday, January 15 in Saskatoon. All of the main crop-based commodity organizations in the province have meetings and they cooperate to hold a Wednesday evening Special Session.

A new organization has joined Crop Production Week – the Saskatchewan Soil Conservation Association, which will hold its meeting on Thursday, January 13.

It should also be noted that the Saskatchewan Fruit Growers meeting has been changed from two days to just Saturday.

Most of the Crop Week meetings, including the 2011 Special Session are at the Saskatoon Inn. Exceptions include the Saskatchewan Ag Grads program centered at TCU Place, the Pulse agenda which includes events at Prairieland Park and the Saskatoon Inn, and the Saskatchewan Canola Growers Association meeting which has been moved to Prairieland Park.

Please note that the Tuesday session of Pulse Days is live at the Saskatoon Inn with a live video feed to Prairieland Park. This year, Hall A at Prairieland Park is being utilized. Since this is a somewhat smaller space, registration for the Prairieland location will be more limited than in previous years. Pre-registration is advised.

The Special Session will start at 7:00 pm. There’s no charge to attend and after the formal presentation and questions have concluded, there will be complimentary refreshments and dainties along with a cash bar.

The Western Canadian Crop Production Show runs in conjunction with Crop Production Week. This industry leading trade show goes from January 10 to 13 at Prairieland Park.

For the latest information on both events, check out www.cropweek.com. From this common portal, you can find information on the Crop Week meetings or the Crop Show exhibitors.

As you read through all the Crop Week meeting agendas on the following pages, hopefully you’ll find many topics that are relevant and useful to your operation.

See you in Saskatoon.

The organizations participating in Crop Production Week 2011 include:

- Saskatchewan Agricultural Graduates Association
- Saskatchewan Flax Development Commission
- Saskatchewan Winter Cereals Development Commission
- Canaryseed Development Commission of Saskatchewan
- Saskatchewan Pulse Growers
- Saskatchewan Oat Development Commission
- Saskatchewan Seed Growers Association
- Saskatchewan Mustard Development Commission
- SaskCanola
- Saskatchewan Soil Conservation Association
- Saskatchewan Canola Growers Association
- Canadian Wheat Board
- Saskatchewan Fruit Growers Association

The meetings are designed to provide useful information on agronomics, the market outlook and policy issues. The agenda is included in this supplement, but the website is the best way to keep track of ongoing changes.

Some of the meetings have pre-registration, but for most you just register at the door. Registration information is posted on the website. Just click on the “Registration” button.

For 2011, the Wednesday evening Special Session returns to the Saskatoon Inn. The session features Drew Lerner on World Weather, Inc. of Topeka, Kansas presenting Weather Outlook 2011. Drew’s weather forecasts have gained quite a following on the Canadian Prairies. A 2011 subscription to World Weather, Inc. growing season forecasts will be the door prize for the evening.

Maximum yield beyond the field.

When providing accounting services for agriculturally based clients, we recognize that maximizing yields goes well beyond the field. Whether your focus is primary production, a supplier to agriculture, or value added manufacturing and processing, our team of agri-business experts will separate the wheat from the chaff, clarifying and simplifying your most complex issues to help you realize optimum gains.

We’re committed to helping you grow your business, direct change and plan for ongoing success. Call (306) 934-8000 today or visit our web site to get started on a plan that works for you.

SALES - SERVICE - REPAIR
All Vacs Including:
Conveyair, Walinga, Turb-Ok, REM, Kongskilde
Blower & Airlock Rebuilding

CROP PRODUCTION BOOTH # E134

Remote Boom Control
Check and service your nozzles easily. No more running in and out of the cab. A handheld remote turns on individual booms one at a time from behind the sprayer. Available to fit any sprayer.

Remote Start & Auger Swing
Increase the efficiency of unloading a semi with a remote start for your tractor. Use the same remote to move your existing hydraulic-driven swing auger under the trailer to eliminate getting in and out of the truck multiple times.

You’re invited to
CWB Day
Friday, January 14, 2011
Saskatoon Inn

Interested in crop quality or grain movement?
Wondering what WeatherFarm™ can do for you?
Looking for a sneak peek at the 2011 weather and markets?

Then, CWB Day is for you.
Hear from the experts. Network with other producers.

Registration and coffee from 8:30 a.m. – 9 a.m.

Cost: $10 (includes lunch) or $5 if you pre-register.
Call (306) 975-6999 or stop by the CWB booth to reserve your spot.
The perfect complement to your Westeel bin package, Westeel now offers its line of professionally engineered portable grain augers, grain vacs and grain cleaners, all manufactured to the same exacting standards that you’ve come to expect from the Westeel name.
