On behalf of the Government of Canada, congratulations to Manitoba Ag Days on its 40th anniversary and greetings to all visitors. With the latest agricultural tools, equipment, and technology on display, as well as a host of excellent speakers, it’s no surprise that this event attracts over 500 national and international exhibitors and up to 50,000 visitors. Be sure to check out the Inventor’s Showcase, for example, for new ideas and products to help your business grow.

Innovation is one of the Government’s key priorities to keep agriculture strong and growing in Manitoba and across Canada – along with trade, market development, food processing and sustainability. Manitoba’s agricultural sector plays a strong role in keeping Canada’s economy strong. I am proud to work with Minister Eichler as we invest $176 million in cost-shared programming in Manitoba under Growing Forward 2, a five-year, federal-provincial-territorial policy framework to advance the agriculture industry. The Government is working with the provinces and territories, and listening to farmers, food processors and Canadians, to develop the next national agricultural policy framework to begin in 2018. The new framework will be geared to the unique needs of farmers and processors in Manitoba and across the country, and to building Canada’s success overall on the world stage.

Manitoba Ag Days is an exciting event to launch the New Year, to celebrate Manitoba’s dynamic agriculture and agri-food industry, and to inspire innovations on the farm. Congratulations to everyone involved in making this event a growing success over the past four decades! Enjoy the show, and be sure to stop by the Agriculture and Agri-Food Canada exhibit!

On behalf of Manitoba Agriculture and the Province of Manitoba, it is my pleasure to welcome you to Manitoba Ag Days 2017. This is a special year as Ag Days celebrates its 40th anniversary.

Ag Days has come a long way since its inaugural event in 1978, which began as the Weed Fair. Today, Ag Days is one of western Canada’s premier farm shows. Producers and industry convene at Ag Days annually to discover the latest technologies and equipment, meet with industry experts and commodity suppliers, and take in some good old fashioned networking to regenerate before spring seeding.

Manitoba’s agriculture sector has a rich history and is a key area of economic focus with the potential for new jobs and growth. Our hard-working farmers are innovative and resilient. They respond to challenges with solutions that allow the sector to thrive. Manitoba’s economic growth relies on a robust agriculture, agri-food and agri-product sector. I encourage you to visit the Manitoba Agriculture booth and speak with knowledgeable staff on the programs and services the department offers to enhance your bottom line and leverage the opportunities available to you.

After 40 years, Ag Days continues to be a place of discovery. It is a place to explore equipment, innovation, technology, and to learn the latest in crop and livestock production, and farm business management.

Thank you to the organizing committee. Increased display space is a welcome addition this year. An event of this scale takes a lot of effort and planning to execute and I thank you for your commitment in planning Ag Days year after year.

Enjoy Ag Days 2017.

Lawrence MacAulay
MINISTER OF AGRICULTURE AND AGRI-FOOD

Ralph Eichler
MINISTER OF MANITOBA AGRICULTURE
Welcome to Ag Days 2017

Greetings & Welcome

As Mayor and on behalf of Brandon City Council and indeed the citizens of Brandon, I am extremely pleased to welcome folks to Manitoba Ag Days taking place at the Keystone Centre from January 17–19, 2017. We hope you will be able to join us this year particularly because Canada’s Largest Indoor Farm Show is celebrating their 40th Anniversary right in our hometown of Brandon. Manitoba Ag Days is an exposition of agricultural production expertise, technology, and equipment that attracts exhibitors and visitors from across Canada and the North Central United States. The City is delighted to host this annual event which continues to thrive as one of the premier events of its kind in Canada and features over 500 exhibits with 50,000 visitors attending the show over the three days. Thank you to the sponsors and organizers for their many hours of commitment and dedication which contribute to one of Brandon’s largest events of the year. Brandon is surrounded by agriculture and we are thrilled to extend our hospitality to everyone attending this event.

Best Regards,

Rick Chrest
Mayor of Brandon, MB.

@MBAgDays #agdays17 @MBAgDays

Greetings & Welcome

Welcome to the Manitoba Ag Days 40th Anniversary Show! We are very excited to present to you Canada’s Largest Indoor Farm Show, a show filled to capacity featuring the latest in equipment, technology and information. Ag Days has always been known for being the first show of the year; it truly is “Where the Ag Year Begins.” This year promises to be our best show ever — we have added on 18,300 ft2 of show space which means we are using absolutely every square inch of the Keystone Centre that is available to us, and we still have a waiting list! We are very proud of the fact that our show is 100% Pure Farm. This means that all of our exhibits are required to be of an agricultural nature so farm business is the focus. With over 550 exhibitors spread over 10 acres of indoor space, this is truly your one-stop shop for all of your agricultural needs. We thank all of our exhibitors for staying true to our 100% Pure Farm Motto — it makes us a very unique trade show and one we are very proud to be a part of.

We would also like to thank all of our sponsors and supporters of Manitoba Ag Days; our show would not be the success it is without your partnerships! You will find our sponsors mentioned on various pages in this guide; please take the time to thank them when you visit them at their displays.

Our board has spent a lot of time and effort bringing in the most profound speaking line up ever! There is not a single session that won’t have you wanting more. We have a real focus on agronomy this year, plus business management, marketing, and success stories from our industry. We also have a focus on Farm Safety! Farm Safety is extremely important to our show and our board, so we have decided to open up our Farm Safety Zone to all of the exhibitors at Ag Days 2017. The Canadian Agricultural Safety Association is launching their new mobile grain entrapment trailer at our show.

We are thrilled and honored to be the first trade show that showcases this very prestigious and much needed training tool for Western Canada.

You may notice that we have moved our exhibitors around this year, so please take some time to plan out your days in advance. We have an interactive map on our website that is very mobile friendly to help you locate the exhibitor you are looking for. Between the exhibitor movements in the show, the extra square footage, and this year’s incredible speaking line up, you may want to visit the show all three days. You will not be disappointed! We are going to be using the hash-tag #agdays17 so follow along on Twitter and Facebook and we will keep you updated.

At the show, you will notice the exhibitors participating in our NOSTALGIA COMPETITION — they have been challenged to bring something “old” to Ag Days this year whether that be an old implement, an old tool or maybe even an old show ribbon. There is an opportunity for all of our exhibitors to win a substantial cash prize for participating, and if they donate their winnings to a charity, Manitoba Ag Days will match their donation! As for the patrons, if we see you wearing something NOSTALGIC at our show we will reward you with a 40th Anniversary gift. Join in, let’s have some fun! It’s time to celebrate and kick off 2017 in style. Speaking of kicking things off, be sure to join us on Tuesday January 17th at the Roadhouse in the Canada Inn’s where the Canada Inn’s is supplying a breakfast for a minimum charge of $5, with all proceeds going to Agriculture in the Classroom – Manitoba!

We look forward to seeing you at our 40th Anniversary Show.

Brad Crammond & David Laudin
Co-Chairmen, Manitoba Ag Days

Rick Chrest

Manitoba Canola Growers Program
Tuesday, January 17th — AM
FCC Theatre

9:00 AM
Canola Disease Dilemmas, Disease Management and Mitigating Loss
Angela Brackenreed, Regional Agronomist, Canola Council of Canada
Justine Cornelissen, Regional Agronomist, Canola Council of Canada

2016 proved to be a challenging year on several canola disease fronts. One disease that has been of increasing concern across the Prairies is blackleg. This silent yield robber is frequently confused with other canola diseases. This results in lost opportunities to manage the disease in field, and allows losses to be misdiagnosed. This presentation will cover diagnostics of blackleg symptoms compared to other canola diseases, along with best management practices and a new resistance stewardship method to help reduce blackleg infections in canola.

10:15 AM
Canola Market Access - An Update
Patti Miller, President, Canola Council of Canada

Patti is the President of the Canola Council of Canada (CCC), representing 46,500 canola growers and industry partners across Canada. Patti will share an update on canola market access around the world and the work CCC has been doing to maintain access to vital markets for Canadian producers.

11:00 AM
Canola Market Forecast
Thomas Mielke, Executive Director of Global Research & Analysis, OIL WORLD

In his presentation on “Canola Market Forecast” Thomas Mielke will highlight the growing dependence of consumers worldwide on Canadian canola. In the world crop season 2016/17 Canadian farmers will benefit from production shortfalls of rapeseed and canola in the European Union, Ukraine and China. Latest supply & demand estimates will be presented for the key countries. Thomas Mielke, who comes to us from Hamburg, Germany will also highlight the supply, demand and price outlook of soybeans and products as well as oil palm oil and other commodities, which will have an impact on the price outlook for Canadian canola. To conclude, Thomas will share a tentative view for the 2017/18 season.

Agriculture At All Levels
Tuesday, January 17th — PM
FCC Theatre

1:00 PM
Ag Days Gives Back Awards Presentations

1:15 PM
Let Food Be Thy Medicine
Jordyn Ham, Student, MacGregor Collegiate, MacGregor, MB
Alice Rooke, Student, Vincent Massey Collegiate, Brandon, MB

In October 2016 Jordyn and Alice were awarded a trip to the 30th Anniversary of the Global Youth Institute, World Food Prize conference in Des Moines, Iowa. World leaders, scientists, professors and students gathered to discuss the growing crisis of food shortages and agricultural matters relating to the global issue. Participating in this annual event has changed the future for Jordyn and Alice, their goals towards further education and future careers have become clearer after this event. Join Jordyn and Alice and be inspired on how you can make a difference as well.

1:30 PM
Dignitaries Address

The Honourable Ralph Eichler
Minister of Agriculture
His Worship Rick Chrest
Mayor, City of Brandon

2:30 PM
Bathtub to Boardroom - The Little Potato Company
Angela Santiago, Co-founder / CEO, The Little Potato Company

Angela Santiago and her father built the Little Potato Company from, quite literally a bathtub full of freshly washed Creamer potatoes delivered to local farmers markets by car to now having stores across Canada and in all 50 states. Sprouting from an idea to introduce Creamers to North America from the Netherlands, the first crop was hand grown, harvested, washed and delivered to local farmer markets in Edmonton, AB and now includes a large network of carefully selected growers. Home cooks and chefs alike have embraced these delicious new small potatoes and the company expanded. Early next year the company will open its first US processing plant to help meet growing demand across North America. Angela Santiago will share the company story and the lessons she and her team have learned in creating and championing an entirely new produce category for Creamers.

3:30 PM
Grain Market Outlook
Larry Weber, President, Weber Commodities Ltd.

Larry is President of Weber Commodities Ltd. based in Saskatoon, Saskatchewan where he operates a commodity analysis company with farmers, the trade and importers as clients. Join Larry in his presentation as he emanates his ability and enthusiasm to tell it like it is in a language and style that only a true Saskatchewan farm boy with an undying passion for this industry could ever hope to match. Larry will explore the commodity market outlook for the coming season and identify the emerging market trends for the year ahead.
Seminars & Workshops

Think Safe, Be Safe, Act Safe
Tuesday, January 17th — AM
MNP Theatre

10:00 AM
Be Grain Safe
Glen Blahey, Agricultural Health & Safety Specialist, Canadian Agricultural Safety Association
Recognizing and understanding the potential impact of agricultural workplace hazards is a key business risk management strategy. With an ever increasing volume of grain being handled and stored on Canadian farms, producers need to enhance their health and safety risk management strategies. The Canadian Ag Safety Association’s BEGRASINSAFE program is intended to stimulate safer practices and procedures for grain handling and storage.

10:15 AM
"Because I Love You"
Angela Fox, Owner/Operator, Steadfast Ranch, Eddystone, MB
Have you ever stopped to think about the unthinkable? After the untimely loss of their husbands in farming accidents, Maggie Van Camp and Angela Fox created the "Because I Love You List." The list consists of all the things that you might not think of in the day to day operations of your farms. Family farms can be extremely complicated and going through the "Because I Love You List" will help you to get started with some important planning!

11:00 AM
STARS - Shock Trauma Air Rescue Society

11:15 AM
Triumph Over Tragedy - A Personal Journey
Curtis Weber, Safety Consultant, C Weber Consulting Ltd
A young teen from small town Saskatchewan had his life taking him exactly where he had always dreamed it would take him. Instead on his third day of a new job at the age of 17, Curtis found himself in a battle of life or death as over 40,000 volts of electricity surged through his body. Curtis uses his own personal experience of a near fatal workplace incident to tell his story. Join Curtis as he takes you on his journey and challenges how you think about safety.

Celebrating 40 Years of Ag Days Success
Tuesday, January 17th — PM
MNP Theatre

1:00 PM
Farm Transition - Panel Discussion
Tere Stykalo, Regional Ag Leader, MNP LLP
Every farm operation that hopes to succeed for another generation will have to go through some type of management and ownership transition no matter what. Tere Stykalo, Regional Ag Leader, from MNP will facilitate a discussion with a panel of farmers who have or who are currently going through their own farm’s succession plan. Come hear real life examples from the perspective of both the incoming and outgoing generations as they work through this challenging process themselves.

Machinery, Technology & Agriculture
Wednesday, January 18th — PM
FCC Theatre

1:00 PM
From the Souris Valley to the Silicon Valley
Scott Day, Agronomist, Fall Line Capital / Producer, Troulan Farms Ltd.
Scott will be sharing his experiences as part of a farm investment and management company based out of San Francisco, USA. Fall Line Capital invests in farmland across the USA with the intent of improving the land through better agronomy, installing irrigation and drainage, encouraging unique crops and implementing conservation ag practices wherever possible. Our goal is to work with local farmer to manage our farms and do whatever is needed to improve soil-quality while maximizing income. Join Scott as he highlights some of the company’s investments in the latest new ag technologies.

1:45 PM
Big Data & Precision Ag - Panel Discussion
Brenda Tjaden Lepp, Co-Founder / CEO, FarmLink Marketing Solutions
Wade Barnes, President / CEO, Farmers Edge
Mitch Rozansoff, Integrated Solutions Manager, Ennis Brothers
Join us for a panel discussion on big data and precision agriculture. The panel will explore some burning questions such as: How can we use the data we are collecting on our farms? Has it improved productivity, profitability and marketing? Who owns and controls the data you are collecting? Learn about different ways of integrating farm management decisions using your own information.

2:30 PM
UAVs in the Sky - What You Need to Know
Matthew Johnson, Owner, M3 Aerial Productions
UAVs are becoming more popular every day, and the applications for their use are growing at the same rate. There are many misconceptions about the use of UAVs, as people often tend to think of them more as toys than as aircraft. The fact is, a UAV operator is called a “pilot” because they are at the controls of an aircraft that shares the skies with airplanes carrying human beings. There are many applications in agriculture for UAVs which will be discussed, including NDVI and Digital Elevation Modeling, however, we will also focus on the importance of understanding the regulations, limitations, and safe practices for operating UAVs commercially.

3:30 PM
Harvesting the Power of Storytelling
Terry O'Reilly, Host/Writer, Under The Influence, CBC Radio
Every industry must have a compelling story to tell. Stories help differentiate your industry, your brand, your farm and your product. Telling good stories is an important vehicle to help communicate intangible elements like trust, confidence and value. Join veteran adman and radio host Terry O’Reilly as he breaks the art of storytelling down, shows how to harvest stories from your business and how to package those stories into powerful marketing that wins hearts and dollars.

Back to Our Roots, “The Weed Fair”
Wednesday, January 18th — AM
MNP Theatre

9:00 AM
Weed Survey & More
Dr. Jeannette Gaultier, Weed Specialist, Manitoba Agriculture
To celebrate the 40th anniversary of Ag Days, Jeannette will review shifts in weeds populations across Manitoba since 1970. This presentation will include results from the 2016 general weed survey. Shifts in weed populations (or a lack thereof) will be related to changes in agronomic practices and innovations over the years with a discussion on the impact to Manitoba farmers.

9:30 AM
The Cost of Simplicity in Weed Management Programs
Dr. Rob Gulden, Professor, University of Manitoba
In this presentation, Dr. Gulden will look at how weed management systems on farms today, although simplified and quite effective, can result in unexpected longer term consequences. Herbicide weed resistance hit farms hard in the early 90's and we must remember the lessons learned when pest control products like herbicides are easy and inexpensive to use. So what are some of the causes that we must beware of? Are they different than say 25 years ago? Some of those consequences may be lurking in the background, ready to strike an unaware producer. Dr. Gulden will highlight some of those consequences and how to manage the weed control resources available to crop producers today in order to prevent costly mistakes from happening.

10:15 AM
Integrated Weed Control
Dr. Neil Harker, Research Scientist, Agriculture & Agri-Food Canada
Before selective herbicides were available, growers suppressed weeds with delayed seeding, pre- and post-seeding tillage, summer fallow, forage grass and legume rotations and fall-seeded winter cereal crops. Later, as rotations became less diverse and selective herbicides were repeatedly applied, weed resistance to herbicides started to build rapidly. With herbicides being a relatively non-renewable resources, alternative weed control methods are urgently required before the utility of precious herbicide tools is severely compromised or lost. Combining practices such as crop rotation, planting competitive crop cultivars, silage production, using higher than normal seeding rates and adopting harvest weed seed control techniques such as chaff collection will be discussed as integrated weed control tactics that can be effective and are important for cropping system sustainability.

11:00 AM
Sprayers and the Unfolding Spraying Technology Revolution
Tom Wolf, Owner, Agrimeter Research & Training
Pesticide application over the past 80 years has been dominated by the hydraulic nozzle. Recent heightened concerns about spray drift and product performance have brought innovative application methods back to the forefront. This presentation will discuss the latest advances in the state of the art of pesticide application, including a forecast of technologies that are in the pipeline.
BDO HELPS FARMS RUN SMOOTHLY

For over 90 years, BDO has been a vital part of Canada’s rural communities. Our team of professionals provides practical advice and insight, tailored to the unique needs of agribusiness owners.

Visit the BDO booth #1208 at Manitoba Ag Days for your chance to win a Weber Smokey Mountain Cooker™ Smoker*

Let’s Talk Beef
Wednesday, January 18th — PM
MNP Theatre

12:00 PM
Great Tastes of Manitoba
Donalée Jones, Senior Producer, Great Tastes of Manitoba

For over 27 years Great Tastes of Manitoba has been sharing positive stories about local food and local farms with home cooks and urban consumers. The cooking series airs Saturday evenings on CTV and is Manitoba’s longest running locally produced television program. Donalée Jones, Great Tastes Senior Producer, will explain why the series is an important tool for our industry and how we can educate consumers about agriculture through entertainment.

1:00 PM
Risky Business
Peter Manness, Farm Management Consultant, MNP LLP

More Coverage? Less Coverage?? No Coverage??? New and changing insurance options have left farmers more confused than ever as to what product and coverage best meets their risk management needs. All this at a time when declining revenues and increasing production costs are on a collision course with each other. Peter Manness, Farm Management Consultant with MNP will discuss benefits and drawbacks to some popular insurance products including, AgriStability, AgriInvest, Crop Insurance and DARS.

1:30 PM
How to Extend Your Grazing Season in Manitoba
Shawn Cabak, Farm Production Extension Specialist - Livestock, Manitoba Agriculture

Learn how you can graze 365 days of the year using a variety of extended grazing methods including bale, swath, corn grazing and more. Extending the grazing season can cut winter feeding costs and reduce yardage and manure hauling expenses. Shawn has worked with Manitoba Agriculture across the province since the early 1990’s and is currently the Livestock Specialist in the Portage La Prairie office focusing on livestock and forage. Shawn is involved with the Manitoba Beef Forage Initiative in Brandon leading the extensive Wintering Project.

2:00 PM
Antibiotic Usage and Practical Uses of Pain Control
Dr. Roy Lewis, DVM, MERX Animal Health

Prudent usage of antimicrobials by all of us will go along ways to controlling resistance. Producers will learn areas where we are overusing antibiotics, where there is no need to use antimicrobials, where different antimicrobials could be used and some definite no-nos. Preventative treatment such as vaccinating to minimize sickness will also be discussed. Deoneu could mean excessive dose, excessive time frame or given to animals unnecessarily. Pain control has really been brought to the forefront with the beef calf of practice. This presentation will outline areas producers are using pain control in cattle production and the new products that are available as well as the benefits that result.

2:45 PM
Record Rally, Record Decline – Now What?
Brian Perlüt, Manager/Dealer Analyst, Canfax

This Canfax presentation will provide an industry update and insights into the Canadian cattle market. Although market signals have improved, the Canadian industry remains relatively cautious. Cattle markets have strengthened since the spring of 2013, but there are still regulatory and market factors that are negatively impacting the market. The longer term outlook remains positive, and an update will be provided on key factors to watch, and how current market conditions will affect each supply chain player differently.
Congratulations
on 40 years of showcasing and supporting agriculture

FCC is proud to support Manitoba Ag Days and looks forward to continuing to work together for years to come. Thank you for all you do for the industry!

Seminars & Workshops

Mother Nature at Her Finest
Thursday, January 19th — AM
FCC Theatre

■ 9:00 AM
Sclerotinia - The Other White Combine
Keith Gabert, Agronomy Specialist, Canola Council of Canada

Sclerotinia remains the most unpredictably consistent yield robbing disease on the Canadian Prairies. Recommended management strategies for sclerotinia have changed little in the last few decades, yet consistent moisture during flowering in 2016 drove this disease to record levels in many prairie canola fields. Are there improvements available in the way we manage this disease? Where is the industry at on predictive disease forecasting, petal tests, impact of crop rotation, or improvements in fungicide application? At fungicide decision time in 2017 is there any better option than checking if your pant legs are wet as you walk through a canola crop coming into flower?

■ 9:45 AM
Navigating the Fungal Jungle: Disease Update
Holly Derksen, Field Crop Pathologist, Manitoba Agriculture

The 2016 season brought many challenges to producers, not the least of which was increased disease pressure due to wet conditions. In many cases, the “usual” management practices were not enough. This presentation will summarize the disease survey results from 2016 and attempt to predict what could be in store for 2017.

■ 10:15 AM
Protect the Quality of Your Stored Grain from Insect Infestations
Brent Elliott, Infestation Control Officer & Sanitation Officer, Canadian Grain Commission

 Stored grain insects are a perpetual concern in on-farm grain. Many of the stored-product pests found in Canada are able to survive well in grain bins that are not cooled and some are able to withstand substantial periods of cold weather as well. The trend to storing grain through the summer season brings additional considerations to the table. Considerations for storage and monitoring will be discussed.

■ 11:00 AM
Will the Weather Extremes Persist on the Prairies?
Drew Lerner, Senior Agricultural Meteorologist, Weather World, Inc.

Drew Lerner is a well known face at Manitoba Ag Days, sharing weather information several times over the past 40 years. Drew will provide a quick review of current soil conditions and details about the various weather patterns prevailing for spring and summer 2017. Join Drew as he forecasts weather patterns for the coming year and whether La Nina will play a factor.
Seminars & Workshops

Agriculture: From the Ground Up
Thursday, January 19th — PM
FCC Theatre

1:00 PM
New Tillage Techniques
Marla Riekman, Soil Management Specialist, Manitoba Agriculture

There are so many tillage tools to choose from right now that it can be difficult to decide if and when a farmer should invest in more iron. Vertical tillage, strip tillage, and subsoiling are some of the top tillage techniques being adopted (or considered) by Manitoba farmers. This presentation will review Manitoba data on the benefits and limitations of new tillage tools available.

1:45 PM
Controlled Traffic Farming – A Manitoba Experience
Adam Gurr, Producer/On Farm Researcher, Agritruth Research

Adam will discuss his experiences with Controlled Traffic Farming and share the results from his recently completed on-farm CTF project. He will look at the potential benefits of adopting a CTF system in Manitoba as well as some of the challenges they have encountered along the way.

2:30 PM
Two Steps Forward, One Step Back: Challenges for IPM in Prairie Agriculture
Dr. John Gavloski, Entomologist, Manitoba Agriculture

Integrated pest management (IPM) involves using the best mix of control methods for a given pest. Chemical insecticides are a component of IPM, but according to the original definition of IPM are to be used in the manner least disruptive to biological control. Conservation of natural enemies of potential pests is one of the basic components of IPM. Advances in crop breeding, our knowledge of beneficial organisms, and in some instances insecticide selectivity have in many ways made it easier to conserve natural enemies of crop pests. Other changes to cropping systems have improved some aspects of crop production, but at times inadvertently reduce the ability of natural enemies of pests to thrive. Join John as he reviews the challenges to effective IPM.

Visit us at the Kal Tire booth or go to: KalTire.com/locations to find a store near you.
**Agronomy Trends**

Thursday, January 19th — AM
MNP Theatre

**9:00 AM**
Benefits of Pulse Crops in the Rotation
John Heard, Crop Nutrition Specialist, Manitoba Agriculture

Pulse crops contribute many benefits to Prairie crop rotations. Crops such as soybeans are profitable and increasingly adapted across the Province, which provides disease management benefits when used to lengthen canola – wheat rotation. The nitrogen fixing ability of pulses largely reduces the need for purchased nitrogen inputs, and many but not all provide nitrogen credits to the crops following. The generally low crop residue amounts following pulse crops facilitates reduced till or zero-till production. In drier parts of the Prairies, pulse rotations serve similar functions as summer fallow by contributing to soil N and by using water sparingly.

**9:45 AM**
Are All Phosphates Created Equal?
Dr. Don Flaten, Professor, University of Manitoba

Don’s presentation will focus on the principles of phosphorus (P) fertilizer management and the role of selecting the right source of P for a farm field and crop. From a theoretical viewpoint, there are factors that might improve P efficiency or hurt P efficiency, but in practice, the performance of most sources of commercial fertilizer P is often similar, when tested or considered for conditions that are typical for the Canadian Prairies.

**10:00 AM**
Carbon Pricing: Making it Work for Farmers
Sean Goertzen, Climate Initiative Co-ordinator, Keystone Agricultural Producers

Starting in 2018, Manitoba and other provinces will put a price on carbon. A poorly designed carbon price could do little more than increase costs for farmers. A well-designed system, however, could recognize farmers as part of the solution in a way that works for their bottom line. Learn more about how carbon pricing has affected farmers in other provinces, and what it could mean for Manitoba.

**10:30 AM**
Managing Wheat Classes Profitably – Panel Discussion
Fred Greig, Producer, Owner/Operator Avondale Seeds, Reston, MB
Jason Voogt, Agronomist Owner/Operator, Field 2 Field Agronomy Inc.
Lynne Sweeney, Assistant Vice-President, Quality Assurance & Food Safety, Richardson International

What new considerations are now in play for producers? The “Managing Wheat Classes Profitably” panel discussion moderated by Brant VanKoughnet from the Manitoba Wheat and Barley Growers Association will combine the views of a farm manager, a grain marketer and an agronomist to explore the potential management choices and opportunities for farmers within the new classification landscape.

**11:00 AM**
Nitrogen Loss When Applied At Shallow Depths
Dr. Mario Tenuta, Professor, University of Manitoba

How we manage nitrogen for crop productivity will undergo a dramatic change in the coming years. The need to reduce nitrous oxide emissions from agricultural soils will become as important as yield when considering use of N fertilizers. Yes, you read that right. This presentation is designed to understand why nitrogen management will undergo such change. It will also cover the practices you can do to reduce greenhouse gas emissions while maintaining or improving crop yield and efficient use of added nitrogen. The 4R Nutrient Stewardship framework will be used to show what practices of rate, source, timing and placement of N addition in Manitoba are best for reducing nitrous oxide emissions while producing healthy and prolific crops.

**1:00 PM**
The 10 Tax Traps for Succession Planning
Matt Bolley, Tax Specialist, MNP LLP

Succession planning is top of mind for many producers looking to transfer their farming operation to the next generation. There are many ways to implement a succession plan in order to reduce or eliminate taxes, but there are also a number of common tax traps that can frustrate proper succession planning and lead to unnecessary tax being paid by the producer and their estate. Matt will discuss these tax traps and provide solutions to maximize the effectiveness of your succession plan.

**2:00 PM**
Climate Change and Shifts in Crops
Dr. Tom Jensen, Director, North America Program, International Plant Nutrition Institute

Agriculture always adapts to changes. The main changes of the past have been new crop choices, new tillage practices, crop pest outbreaks, and changes in market commodity prices. Climate changes historically have affected agriculture cropping systems in the past, examples will be given. As the earth is experiencing a warming climate how this has affected and will affect what crops we can and will grow.

**2:15 PM**
Let’s Play Micros
Dr. Rigas Karamanos, Senior Agrochemist,钾Fertilizer Canada

This will be an interactive presentation as the audience will be able to participate in providing the right answer for what micronutrients are, which crops are sensitive to which micronutrient, how micronutrient deficiencies are identified and how the 4R nutrient stewardship principal is applied to micronutrient. A discussion of how of how micronutrient deficiencies are corrected will follow the examples from research conducted in Western Canada.

**3:00 PM**

Full value chain organization representing Canada’s entire canola industry.  
- Westman Place Concours
Can-Seed Equipment
Distributor of seed treating, conveyance, fertilizer, design, installation, service, and parts.
[City Square Exhibition Hall]

Canterra Seeds Ltd.
Pendried seed, canola, corn and soybeans.
[Brandon Curling Club]

Capstan Ag Systems Inc
PartTime X, SharpShooter RS, N-Vision, N-Ject Li, N-Ject NH3, Seed-Squirt.
[Barn 2]

Cardale Tech Corp
Water pumps 12”, 16”, 20”, earth moving blades, breaking disks.
[City Square Exhibition Hall]

Cargill Limited
Agricultural services, Cargill specialty canola program.
[Seed-Squirt]

Central Testing Laboratory Ltd.
Testing of feed, food, water and fertilizer.
[Brandon Curling Club]

Century 21 West-Man.com
Professional farm real estate agent specialists.
[Westman Place Concours]

Ceres Global Ag Corp
Ceres Northgate Terminal is a state-of-the-art grain, agriculture services and offload supplies transloading site.
[UCT Pavilion]

Certified Labs
Grease & lubricants.
[City Square Exhibition Hall]

Changing Times, LLC
Dry & liquid seed or fertilizer applicators.
[City Square Exhibition Hall]

CHS Inc.
CHS provides Western Canada farmers outlets on chemicals and canola.
[UCT Pavilion]

CKLQ 880 Star 94-FM
CKLQ 880 Westman’s voice for agriculture.
[MNP Hall]

Clewes Palliser Cattle Oiler Co.
Rope cattle oiler, conversion kits and related accessories.
[Westoba Ag Centre North Concours]

Cloverdale Paint Inc.
OEM coatings for short line manufacturers.
[Westoba Ag Centre North Concours]

Committed Ag Supply
Net wrap, shape film, bale twine, silage plastic, grain bags.
[Westman Place Concours]

Convey - All Industries Inc.
Portable bulk conveyors, seed into development, tenders, commercial seed tenders.
[Westoba Ag Centre Showroom]

Corner Equipment and Advanced Growth Group
Farm equipment sales, service and parts provider.
[Barn 3]

Cory Dalzell
The Calf Cage
[Barn 4]

CPS
CPS is the leading provider of agricultural products and services.
[Brandon Curling Club]

Crazy Industries
Manufacturer of a variety of combine attachments, which include air systems, hooper extensions, shaft spreaders and cutting systems as well as a full line of blower and filling accessories.
[Barn 2]

Cudmore Bros.
We sell engines, augers, grain bins, shortline equipment and aeration.
[Barn 4]

Cummins Western Canada
Diesel power engines, generators, diesel sales and service.
[City Square Exhibition Hall]

Curry Industries Ltd.
Poly covers for sealing grain bags, poly liners, household items.
[Barn 2]

Custom Auto & Truck Accessories
Trailers, auto accessories, trailer lights, LED lighting.
[MNP Hall]

Custom Tarps & Filters Inc
Tarps, washed and new filters, steel sheds, brooms, and tire supplies.
[Westoba Ag Centre North Concours]

Custom Truck Sales Inc. Kenworth
Kenworth trucks, Drop trailer, Globe trailers.
[Kinsmen Arena]

Cypress Industries Ltd.
Quality metal livestock feeding equipment and custom manufacturing.
[Barn 3]

Dave Ross Equipment Ltd.
Grain bins, grain dryers, material handling, storage.
[Barn 2]

Dave’s Machine Shop
Air sharing wheels/trailer jacks/air bags.
[City Square Exhibition Hall]

Decisive Farming
Precision agriculture and crop marketing services.
[UCT Pavilion]

Degelman Industries Ltd.
High performance tillage, extreme duty landrollers, drop and go implements.
[Kinsmen Arena]

deKoning Innovations
Televeyor and Televeyor Xpress – Belt Grain Conveyor
[Barn 1]

Delmar Commodities Ltd.
Grain marketing & seed sales.
[Main Street]

Denray tire
All agriculture, commercial, industrial tires. Tire tread refit facility, 24hr service.
[Barn 2]

De-on Supply inc.
Clean burn used oil furnaces and boilers.
[Main Street]

Devloo Canola Crusher
Devloo canola cruscher to determine green seed count in canola.
[Manitoba Room]

Devloo Roto Mud Scrapers
Devloo Roto Mud Scrapers.
[Manitoba Room]

Diamond Doors
Manufacturer of high quality custom engineered bi-fold doors since 1998.
[City Square Exhibition Hall]

Discovery Seed Labs
Information related to seed and soil testing.
[Westman Place Concours]
EasyFix Rubber North America
Plastic staff dividers, cow brush, cow bedding, rubber for alleys.

Inventor’s Showcase 2016 Awards

Inventor’s Showcase is an annual feature at Manitoba Ag Days designed to encourage the development of products that will assist in farm operations. All inventions are considered whether from individuals or companies large or small. Exhibits developed by farm operators are encouraged.

1ST PRIZE

Reimer Robotics was the winner of the Inventor’s Showcase competition for their agricultural automated robots. Matt Reimer was presented with a plaque and $1000 cash from Manitoba Ag Days and an advertising package from the Manitoba Co-operator. From left to right in the picture are David Laudin, MB Ag Days; Ron Reimer and Matt Reimer, Reimer Robotics; Laura Rance, Manitoba Co-operator; and Blake Nestibo, MB Ag Days.

2ND PRIZE

Winner of second prize in Inventor’s Showcase was MJ Endeavors and his remote controlled vertical livestock gate. He received a plaque and a cheque for $500 from Manitoba Ag Days and an advertising package from the Manitoba Co-operator. From left to right in the picture are David Laudin, Manitoba Ag Days; Gary Smith, MJ Endeavors; Laura Rance, Manitoba Co-operator; Blake Nestibo, MB Ag Days. An Honorable Mention was awarded to Leading Edge for their invention – the Harvest Sweep.
Somebody should speak up.

Somebody should set the record straight.
Somebody should do something.
Well I’m somebody.
You’re somebody.
Everyone in ag is somebody.
So be somebody who does something.
Somebody who speaks from a place of experience, with passion and conviction.
Somebody who proudly takes part in food conversations big or small, so our voice is heard.
Somebody who tells our story, before someone else does.
Somebody who builds consumer trust so our industry can meet the demands of a growing, and very hungry, world.
Somebody who shapes people’s relationship with agriculture.

It can be done.
But it’s a big job that takes co-operation, patience and respect for every voice in the conversation.
We need to build lines of communication, not draw lines in the sand.
Be somebody who helps everybody see Canadian agriculture as the vital, modern industry it is.
Somebody who helps everybody see people in ag for what they are – neighbours, friends, and family who share the same concern everyone does: providing safe, healthy food to the people we love.

Our point of view is important.
Our story is important.
And people want to hear what we have to say.
So be somebody who takes, and makes, every opportunity to share it.

I’m somebody.
You’re somebody.
Together, we can tell everybody.

Don’t know where to start? Here are a few tips.

Speak from the heart
You live and love ag. Share that love with the world.
“Having a conversation with a consumer is actually not as hard as you think. You’re basically telling them what you do.”
– Ravi Bathe, Poultry and Berry Producer

Go where the conversations are
Be an active voice and help shape people’s relationship with ag.
“In order for consumers to support and understand us, they need to know us better. The best people to explain this are the people who live agriculture.”
– Natacha Lagarde, Maple Syrup Producer

Be open and honest
Transparency creates trust, so tell your story.
“What do we have to hide? Nothing. I eat the food I produce. If we tell our story honestly, people will trust us.”
– Sam Bourgeois, Apple Producer

Being an agvocate is easier than you think and we can help.
Visit AgMoreThanEver.ca for resources and tips, and join our community of agvocates from across the country.
Aberhart Ag Solutions
Bio-Sul Premium Plus - The product is elemental sulphur that is blended with finished compost.

Bio Mulcher (A Division of Dutch Industries)
Bio Mulcher Organic Waste Composter crushes bones by mechanically breaking down and aggressively mixing the mortalities with an available carbon source such as straw, corn stocks, sawdust or wood chips

Devloo Canola Crusher
Devloo canola crusher to determine green seed count in canola. To improve the process of testing canola for green seeds with a time saving more convenient method. The unit is portable, weighs 12 lb. measures 7 by 10 by 14 inches.

FenceFast Ltd
STOCKade ST400i Fence Stapler - The ST400i is the world’s first 4mm diameter / 9 Gauge cordless fencing stapler that makes fencing faster, easier and more safer for the fencer/farmer/tractor

Moocall Canada
The Moocall calving sensor - The Moocall calving sensor monitors your cows contractions and sends you a notification one hour before newborn calfs on range pasture

The BinKnocker - A device to monitor product levels in metal bins. To improve the process of testing canola for green seeds with a time saving more convenient method. The unit is portable, weighs 12 lb. measures 7 by 10 by 14 inches.

Wilde Ag Ventures
Air Flow Rate Indicator for Aeration Fans - An air flow rate indicator that is connected to the discharge ducting of an Aeration fan. The purpose of this invention is to prevent farmers from over filling grain bins when attempting in bin grain drying. Over filling the bin will result in the fan dead heading and the air flow rate dropping below the desired minimum. A rule of thumb minimum air flow rate for in bin grain drying is 1 cfm / bushel.

Arnold Innovations
Combine Cylinder Reverser - allows for the combines cylinder to be reversed using hydraulics and a custom engineered wrench, which when not in use conveniently stores in its own harness attached to your combine.

Changing Times, LLC
CT Standard Dry Powder Applicator - US patented sifting system that accurately dispenses dry product onto seed before planting.

Cory Dalzell
The Calf Cage - A safe and quick way to capture and process newborn calves on range pasture

Evolution Wheel
EWR Series - Serviceable Solid Tire for a Skid Steer Loader with the largest treads in the industry and a cushioned ride.

Hird Equipment
The Evolution Wheel - Original - Serviceable Solid Tire for a Skid Steer Loader with the largest treads in the industry and a cushioned ride.

Mj Endeavors
Remote Control Vertical Stock Gate - which pivots upwards to allow a sixteen foot wide opening. Allows the operator to remain in the tractor at all times when feeding stock. Great for stock containment or security purposes.

If you’re involved with cattle and looking to find some of the best genetics then you have a chance to talk to the exhibitors about their herd genetics and do a little comparing as well. Bull Congress can be found in Barn 11 which can be accessed by entering the NE corner of the Kinsmen arena. There will be signage at the show also to help you find your way.
Manitoba Ag Days is a premier agricultural trade show with success attributed to keeping the show current. Exhibitors displaying new products play a key role in this success. To enhance this aspect, Manitoba Ag Days offers the New Products Feature wherein exhibitors may opt to participate in this. Be sure to check out exhibitors that have highlighted New Products for the 2017 show. They can be found by their signage identifying them as well as the listing in the show guide and on our website www.agdays.com. All qualifying entries are judged and the Best New Product Award is presented at the show.

Agtron Enterprises Ltd.
Booth 1215 Westman Place Arena Concourse
This LEGEND Section Aware ensures that up to 240 seed and fertilizer runs are delivering the right rates, and no blockages! It takes the uncertainty out of the seeding operation by detecting tigh/low/no seed rate. Use your tablet or ISO VT to confirm section control functionality.

AirLiquide
Booth 1528, 1529 and 1530 Barn 1
Introducing the new ALBEE™. The Safe and Simple Solution. It is more economical, you get more gas, more pressure and it is as easy as 123! You connect, turn the lever and set your gas flow or pressure. It is safer with its fully protected regulator and it is available wherever you need it. Come and see us at our booth and let us show you how it makes your life ... easy!

BEST Environmental Technology
Booth 1018 and 1019 Westman Place Arena
TM Agricultural is a proprietary formulation that is applied to the plant and the soil’s existing microorganisms. It helps to stimulate strains of beneficial microorganisms that have been dormant, helping to increase and activate bacteria in the soil.

Brownlee Trucking
Booth 490 City Square Exhibition Hall
This LED Flood Light will illuminate the hopper on your swing auger from the truck as you approach. FOB or manual control with automatic shut off. Also converts your Brandt or Meridian lights to wireless. No more climbing in and out of your truck to position your swing auger.

Committed Ag Supply
Booth 1122 Westman Place Arena
Our solutions are designed to deliver real value for farmers — reducing crop inputs, boosting yields, and increasing profits. We make it easy for you to succeed with agricultural intelligence services. Whether you fly your own agricultural drone in combination with our FarmLens™ data processing service or choose one of our complete drone and data processing solutions, we’re here to support you.

Dimo’s Labtronics
Booth 1139 and 1140 Westman Place Arena Concourse
INSTRUMENT temperature readings displayed directly on ANY Smart Phone. This probe is 9’ long with a single INFRA-RED sensor at the tip. Simply turn the probe on and connect using Wi-Fi. Open up the browser on your phone or other Wi-Fi device (IPAD or PHONE) and enter the IP address and the temperature is displayed. These FULLY portable you keep a battery in your area after they are filled and get instant readings... Completely wireless with no cables to plug into... Multiple phones can connect to the same probe and display the temperature at the same time.

Dynamic Ditchers
Booth 1015 and 1012 Westman Place Arena
Dynamic Ditchers is now the proud manufacturer of the new Valérienne Bale Shredder! Bale shredders help handle and distribute bales typically used for feed or for bedding. Our Valérienne Shredder’s uniquely (to be patented) design and heavy duty construction provides strength and versatility that is new to the agriculture market, which allows for better reliability and efficiency, as well as cost savings. The shredder handles both round and square bales, is capable of heating either two round or three square bales at a time and easily shreds frozen or partially frozen, moisture laden bales.

Eastwood Products
Booth 433 City Square Exhibition Hall
HELI – The Heavy Equipment Jack is designed to address the evolution of agricultural and industrial equipment. With the increase in size and weight, this jack will provide a safer and more stable method of lifting heavy equipment in a fixed and secured position.

FMC
Booth 695 Brandon Curling Club
Command® 360ME is a group 13, soil applied, pre-emergent residual herbicide that provides early control of cleavers before any canola system. Command alleviates the initial flush of cleavers. This takes pressure off the in-crop herbicides and allows them to control any secondary flushes, resulting in overall improved control of cleavers.

Free Form Plastic Products
Booth 308 Manitoba Room
Introducing the new cutting-edge way of mixing and blending your chemicals for your agricultural needs. The CHEXIVIBE™ incorporates all the features of a typical chemical mixer plus adds some user-friendly features while dramatically improving operation in a number of areas. Check out our YouTube videos or stop by our booth for more information.

Hypro
Booth 1413 and 1414 Westoba Concourse
Due React® - The Hypro Duo React is a dual port nozzle body that simplifies operation by allowing either or both nozzles to spray at one time. The Duo React allows you to drive at the speed you want and maintain application rate and spray quality desired by switching between two different nozzle sizes. The console works alongside your current rate controller to direct the flow to the appropriate nozzle port based on your speed of travel.

Novid Inc.
Booth 1110 Westman Place Arena Concourse
Novid Inc. is proud to announce their new (DAS) Diffuser Aeration System. DAS safely and efficiently pumps air through 4 plates mounted strategically on the floor of your tank. An on board regulator allows intermittent aeration process from days to hours while drastically decreasing the risk of spills or leaks. DAS has a very low upfront cost and virtually no ongoing costs. DAS: the fastest, safest and most economical way to mix your tanks.

Phller Manufacturing Inc.
Booth 808 Enns Brothers Arena
The Dash Delivery System can increase sprayer productivity by significantly reducing fill times. The operator is able to pre-load multiple chemicals while keeping them separate. The pre-load tanks auto rinse each time they empty. The Dash DS can be individually configured for different deck and tanker trailer needs.

Seed Hawk
Booth 306 and 307 Manitoba Room
Fenn III Meter: Seed Hawk Seeding Systems now feature Valenti’s Fenn III Meter – the world’s most advanced metering technology. Year after year, the Fenn III Meter provides exceptionally accurate seeding, reliable performance and ease of maintenance. In all fields and conditions, growers can count on the Fenn ISI to deliver early, even-emergence and the opportunity for their best yields. Look for details at SeedHawkSeeder.com.
ReDekiNgi FertiLiZeR sInce 1984
We Let Our Results Speak For Us...

“I really like PowerRich because the amount of product to handle is greatly reduced, saving time at seeding by filling less and driving more. There is very little caking in the bin on overwinter storage. Low salt indexes are good for soil health. It is very safe to apply with seed. In 2 years of use I have seen yields up to 65 bu/ac on canola, 65 bu/ac on HRSW with protein levels from 12-14%. I have done in-depth soil testing for 10 years now and will continue to use PowerRich fertilizer.”

- Roger Schultz, Waldheim, SK
Parking Lot Shuttle

Don’t worry about trying to find a parking spot close to the building when you come to Manitoba Ag Days. Once again, Murray Chevrolet will be providing shuttle service on the Keystone grounds so you need not worry about braving the weather or walking if you have physical limitations. Just wait in your vehicle and look for the shuttles cruising the lots throughout the day. You’ll find them decked out with Murray Chevrolet Cadillac Buick GMC and Manitoba Ag Days.

Generations of Being

First in the Field

As three families of farmers ourselves, we’ve been living and working in this region for generations. We’ve used our first-hand experience to provide top-quality, dependable corn, silage corn, and soybean seeds for more than 25 years. We plant and test them ourselves on our farms first to ensure you have seed you can count on for years to come.

Farm Safety Messages

For the 40th Anniversary Show we have decided to open up our Farm Safety Feature to all participants in our show. This allows us to have safety messaging throughout the entire facility. We are pleased to have the Canadian Agricultural Safety Association join us with their new “BeGrainSafe” mobile grain entrapment demo trailer at the 2017 Show. They will be running demos every hour on the hour during the show on the Westman Arena Place Ice Surface.

Brownlee Trucking  - Booth 490 City Square Exhibition Hall
Our Full Bin Super Sensor for grain augers is truly a farm safety feature. It keeps you from having to climb the bin to see when it is filling up. Stats Canada claims that the highest fatalities on farms is from falling off grain bins. We want to prevent that from happening.

FenceFast - Booth 1029 Barn 4
The ST400i is the worlds first 4mm diameter / 9 Gauge cordless fencing stapler that makes fencing faster, easier and more safer for the fence/farmer/rancher. End users asked for a cordless, portable, powerful, one handed stapler to make efficient use of their time spent fencing.

Manitoba Farm, Northern and Rural Support Services - Booth 1037 Westman Place Arena
If you are in crisis and need immediate assistance please call the 24 hour Klinic Crisis Line at: 1-888-322-3019 or the Manitoba Suicide Line at 1-877-436-7170.

Manitoba Farmers With Disabilities (MFWD) - Booth 1029 Westman Place Arena
A volunteer organization started up by farmers who know first hand how difficult farming can be after a farming incident. This organization is committed to education through our own Safe Farms, Safe Families program. Come by our booth to see our showcase units that display potential farm hazards.

Manitoba Hydro - Booth 249 UCT Pavilion
Over the past year there were 90 reported incidents of farm equipment contacting overhead power lines in Manitoba. Farm injuries can have devastating effects, both emotionally and economically. Learn about Manitoba Hydro’s farm safety programs to minimize hazards for you, your family and farm workers.

Never Spill Spout Inc. - Full Bin Alarm - Booth 402 City Square Exhibition Hall
Never climb high Grain Bins! Never plug an Auger! Never overfill a Bin! It’s not just a FULL BIN ALARM, but also a complete Auger Spout with No-Snag Spout and Nightlight. Too many serious injuries and death occur every year by climbing high Grain Bins. We have more than 8000 sold. Most of the comments we get are: “I haven’t had to climb a bin in years”. From a SAFETY perspective, farmers using the Never Spill Spout will never have to climb high bin ladders to visually check grain levels!

Rodono - Booth 409 - 471 City Square Exhibition Hall
The operation of normal swings on augers to place them under the hoppers of conventional B-train grain trucks requires many maneuvers by the one guiding the truck into place to unload the grain, and many moves back and forth by the truckers. With our system the swing auger retracts out of place waiting for the truck to pull into place. Once in the right place, which is easy to determine from the previous unload, the swing simply extends hydraulically under the trailer and unloads both hoppers in the one operation. To move to the next trailer, the swing auger is retracted and the truck moves to the position determined by the location of the retracted swing auger. This swing auger reduces the risk of accidentally running over the hopper of a conventional swing, keeps the handler from being near the truck wheels when they are moving into position, and allows the trucker to handle the unloading by himself. Safety and convenience and reduced manpower requirements are the features of our product.

Canadian Agricultural Safety Association

**BeGrainSafe**  Booth 1001 Westman Place Arena
The grain safety program is being branded to “BeGrainSafe” which includes four educational streams:

1. A mobile demonstration/training unit that will be supported by:
   a. Courses for public awareness/education are being developed
   b. Two courses for basic and advance rescue for emergency responders are being developed
   c. An on-site emergency planning course for individual producers

2. Interactive trade show display:
   a. Includes grain engulfment activity and demonstration of forces restricting breathing when engulfed by grain

3. Table top youth engagement displays:
   a. Includes grain engulfment activity and demonstration of forces restricting breathing targeted to youth age 8-14 years

4. BeGrainSafe Website:
   a. Includes downloadable resources and training materials
   b. Online planning calendar to book the above resources will be made available by June, 2017

Growing soybeans, it’s worth it!

The optimal early-maturing soybean variety will give growers superior profitability. With genetics developed specifically to meet the growing conditions of our northern climate, Prograin soybean varieties will exceed your expectations.

**Canadian Soybean Varieties, Developed by a Canadian Company and Grown by Canadian Producers.**

**That’s what gives us our strength!**

**Come and visit us at Booth # 675, 676, 677 at the Brandon Curling Club**

**Canadian Soybean Varieties**, including key information on drift, coverage and droplet size.

**Tip Wizard**

- Made in Canada

**www.tipwizard.com**

**Tip Wizard is FREE on any smartphone app store or online @ www.wilger.net**

**Use Tip Wizard to Find the Best Spray Tips**

**Simple as that.**

**Pick the Right Droplet Size**

- Match the droplet size to your application, to optimize coverage and drift control.

**Use the Right Spray Tip**

- Including key information on drift, coverage and droplet size.

**With CLEARGAIN® and NEXERA™**

**Clearfield Canola**

You have the opportunity to earn more revenue per acre. You have access to on-farm pick-up options, a higher return, competitive basis levels as well as year-round scheduling.

For more information on how you can earn more with Vittera, talk to your local Vittera Representative today.

Manitoba Ag Days 40th Anniversary Celebrations

The Manitoba Ag Days Board would like to thank all of the exhibitors and patrons of our show. We would also like to thank the City of Brandon and its citizens for allowing us to host Canada’s Largest Indoor Farm Show in the Keystone Center.

To celebrate our 40th Anniversary we have brought in Chad Brownlee to headline at Houston’s Country Roadhouse on Wednesday January 18th, 2017. David James will open for Chad Brownlee and this is all brought to you compliments of Manitoba Ag Days with your $10 Houston’s cover charge.

We are also encouraging every exhibitor to bring something nostalgic and have it on display in their booth to commemorate 40 years of Ag Show Excellence. The top 3 winners will have the option to receive a cash prize of $1000, $500 and $250 respectively. If they choose to donate the funds to a local charity, Manitoba Ag Days will match their contribution.

We are also encouraging every patron to wear something nostalgic to the show. Our board will be handing out prizes to every patron they see participating in this year’s celebration. This is one show you are not going to want to miss!

Nostalgia Competition

Wear something nostalgic to the show in celebration of our 40th anniversary - our board will be on the lookout to hand out prizes to all participants!

Chad Brownlee & David James

Chad Brownlee will headline at Houston’s Country Roadhouse on Wednesday January 18th. David James will open for Chad and this is all brought to you with your $10 Houston’s cover charge.

Manitoba Ag Days Milestone Celebrations

We would like to congratulate exhibitors in our show who are also celebrating a milestone.

Nostalgia Competition Chad Brownlee & David James

Manitoba Ag Days would like to recognize all of the hard work that our board puts in throughout the year. Rejean Picard has decide to step off of the board for the 2017 show. We would like to thank Rejean for all of his years of dedicated service to our board with a real impact on program and move in. Rejean was replaced by Hannah Minshull who works for MB Ag out of Melita. Hannah and her family live in Pierson, MB. After the 2016 show Blake Nestibo decided to step down from his co-chair position but has gladly agreed to stay on our board for another term. Brad Crammond gladly accepted the position as co-chair and he and David Laudin are leading our team for this 40th Anniversary Celebration!
