4600L WESTEEL OPTI-VAULT

- CAN-ULC S601 Approved
- Durable Steel Construction
- Secondary Shell Provides a Minimum 100% Containment
- Powder Coat Finish

20' x 3/4" Arctic Hose
Automatic Nozzle
Drip Pot
Hose Retractor
Level Gauge
Dip Stick

25,000L MERIDIAN DOUBLE WALL TURNKEY PACKAGE

- Red Jacket 4" Submersible Turbine Pump
- Fill Rite 901 Meter
- Standard Skid
- Micron Particulate Filter

- 20' x 1 1/8" Arctic Hose
- 1 1/16" Automatic Nozzle
- Heavy Hose Retractor

$2,795

4600L WESTEEL FUEL-VAULT TURNKEY PACKAGE

- Fill Rite FR701V Pump (20 GPM)
- Fill Rite 807C Meter
- Filter
- 20' x 1 1/4" Arctic Hose
- Automatic Nozzle

- Drip Pot
- Hose Retractor
- Level Gauge

$6,595

7400L MERIDIAN DOUBLE WALL TURNKEY PACKAGE

- Fill Rite FR370V Pump
- Fill Rite 9000DP Meter
- Filter
- 20' x 3/4" Arctic Hose
- Automatic Nozzle

- Drip Pot
- Hose Retractor
- Level Gauge
- Dip Stick

- Standard Skid
- Stairs with Platform

$12,500

CIA Buildings Ltd. has been pushing the envelope in the post frame industry for over a decade. New building procedures and practices continue to separate CIA Buildings from other post frame manufacturers. One of the most innovative yet misunderstood practices is Hammer-Lock Rock Pilings.

Traditionally, post frame builders will use a concrete plug or steel plate at the bottom of a post hole to distribute the weight and load of a post over a greater surface area. The idea of this practice is to reduce settling in the building. However, research and development at CIA Buildings has discovered a few potential issues with this practice.

Plugging the bottom of a post hole creates a dam, preventing water from efficiently draining away from the post. While posts are built using PWPV lumber, the moisture retained around the dam can lead to frost jacking.

Plugging the bottom of a post hole only distributes the post load over 200 square inches. A standard 40’ wide structure loads 7000 pounds per post, which means the post is loading 35 pounds per square inch on a plug (these numbers dramatically increase on wider buildings). While the plug may be able to handle that load, the soil under it may not. The commonly accepted load rating for undisturbed soil is 10 pounds per square inch.

CIA Buildings’ Hammer-Lock Rock Pilings solve both of these issues. Using a 1,500 lb. hydraulic hammer, washed rock at the bottom of the post hole is compacted to 3,000 PSI. This hammering process also compacts soil around the footing, creating a rock solid foundation with excellent water drainage for your post to stand on for decades to come.

Hammer-Lock pilings are just one example of how CIA Buildings’ structures are built for life!

CIA Buildings Ltd. is an Alberta company, owned and operated by Albertans. Based in Sturgeon County, AB, the company creates the most durable, economical buildings ranging from oversized garages to 100’ x 300’ buildings. From simply-appointed, bare-bones structures to insulated buildings with clad interiors and in-floor heating, CIA can craft exactly what you want. CIABuildings.com.
Designed with the farm customer in mind, Westeel’s Magnum Series of professionally engineered smoothwall hopper bottom bins provide years of trouble-free clean-out and superior protection from corrosion and represent one of the best values in smoothwall storage. Westeel’s smoothwall bins come with a 10-year structural guarantee and a 5-year finish warranty (1-year warranty for commercial usage).

**STANDARD FEATURES**
- State-of-the-art finish to protect from weather and corrosion
- Pressed top and bottom hopper cone sheets
- Exceptional bin clean-out
- Standard three-ring foundation on most models
- All bins are fully accessorized for safety and convenience

**MAGNUM-F**
- Specifically designed for safe, long-term storage of fertilizer, grain and seed
- Holds 27 to 270 tons

**MAGNUM-G**
- Designed for storage of feed, grain and seed
- Holds 1140 to 6070 bushels

**WESTEEL 1616F FERTILIZER BINS**
Complete with poke hole, manway, manhole, view glasses, LevAlert and double skid.

$15,500

**WESTEEL 1620G GRAIN BINS**
Complete with rocket air, roof vents, manway, manhole, view glasses, LevAlert and triple skid.

$18,500
